

Want to understand the **Higgs hype?**

We can help!

Top news across the world July 5th: **"Scientists Discover Elusive Higgs Boson!"**
For most of us – i.e., everyone not a physicist – it may sound interesting, but our actual understanding is still about as clear as mud. **Illinois Science Council** is teaming up with **137 Films** to fix that. (You'll seem positively brilliant because you'll be able to explain it to others!)

Higgs Boson (aka *the god particle*) Discovery Explained

For poets, professionals, procrastinators, and other non-physicists

Monday, July 16, 2012

6:30 - 8:30pm

Landmark Century Cinema

2828 N. Clark St. (at Diversey), Chicago

Tickets: \$10 in advance; visit HiggsBoson.eventbrite.com
\$15 cash only at the door

Screening of *The Atom Smashers*. ("One of the best science documentaries!" - Bill Kurtis) This film clearly explains the science behind this discovery and the roller-coaster nature of the search at Fermilab, and it beautifully conveys the dedication and conviction of scientists pursuing it. A panel discussion will follow the film featuring physicists from Fermi and Argonne National Laboratories who continue to be involved in the experiments conducted for the Higgs particle.

No science prerequisites or previous understanding of physics is necessary, only curiosity.

Space is limited! Reserve your seat now.
